

The graph displays the number of unix_time for various models. The x-axis represents the number of unix_time, ranging from 0 to 500. The y-axis represents the number of models, ranging from 0 to 10. The legend identifies eight series: semantic-noguidance (blue solid line), semantic-zest (orange solid line), syntactic-noguidance (green solid line), syntactic-zest (red solid line), semantic-noguidance_rollingmean_40 (blue dotted line), semantic-zest_rollingmean_40 (orange dotted line), syntactic-noguidance_rollingmean_40 (green dotted line), and syntactic-zest_rollingmean_40 (red dotted line). All series are plotted at a value of 1 on the y-axis, indicating that each model is represented by a single data point. The rolling mean series are plotted at the same y-value as their corresponding base series.
